Passionate software developer looking to transition into a new technology stack and experience new challenges. Always looking to keep learning new skills in various fields, push for innovation, and find a forward thinking, technology focussed company I can be excited to work for.

Experience

Solutions Developer - Linguamatics Plc.

March 2020 - Present

- Worked to maintain and improve a critical piece of legacy software built with jQueryUI
- Created new React components in Typescript for a business critical demo

IT Developer - South Staffordshire Plc. (Cambridge)

August 2017 - March 2020

- Created a Vue.js app deployed to Azure with Azure DevOps within a short deadline to interface with an existing API after problems arose with an existing app.
- Kickstarted development of a chatbot to solve a problem within the business and drive innovation using Azure resources and Node.js.
- Bug fixing and investigation on legacy software that was handed over by another team.

IT Developer - South Staffs Water (Cambridge)

August 2015 - August 2017

Education

BSc. (Hons) Computer Gaming Technology

Anglia Ruskin University - October 2015
Upper Second Class Honours

A Levels in Maths with Statistics, Psychology, Human Biology

Royal Latin School - June 2012

Interests

Interested in all things technology, playing video and board games and reading manga. I run a fantasy Ice Hockey league for a group of friends and act as Dungeon Master for a small Dungeons & Dragons game.
